SENATE SUMMARY

Creates the Information Resource Commission. Requires all state departments to submit an information technology (data processing) plan to the commission biennially and prohibits the acquisition of information technology resources valued in excess of \$2,500 unless part of a plan approved by the commission. Abolishes the Division of Electronic Data Processing and transfers its functions to the commission and the newly created Division of Information Services in the Department of General Services. Requires an approved plan to accompany legislative budget requests.
